

Lead-Free Solder Pot **300W**

Solder Pot Diameter: 80mm
Capacity: 1350g

10 Heat Settings
Temperature Range: 200-450 C

Designed For Lead-Free Soldering

The Aven Lead Free Solder Pot is ideal for tinning the ends of stranded wire leads, pre-tinning small electrical parts, re-tinning soldering iron tips and dip soldering small circuit boards. Compact and convenient, this device will take up minimal space on your work bench.

Features

- Heating element liquifies solder quickly and provides excellent thermal stability
- Made with anti-erosion, heat resistant materials
- Suitable for melting solder, plastic, resin and more
