sparkfun

SparkFun USB to FIFO Breakout - FT245RL

BOB-07841 ROHS✔

Description: Basic breakout board for FTDI's popular USB to FIFO IC. Now with internal oscillator and EEPROM, the FT245RL is an impressive IC! This FIFO IC gives the user 8 I/O pins for parallel reading and writing.

Board comes assembled with IC as shown.

Dimensions: 1.5x0.92"

Features:

- Implements full v2.0 USB protocol
- Needs no external crystal
- Internal EEPROM for device ID and Product Description strings
- Royalty-Free Driver support for Windows, Linux, and Mac OSX
